Operating Range

To use the remote controller, point it at the device's remote control sensor, as shown below.

Note: The remote controller may not work reliably if the device is subjected to bright light, such as direct sunlight or invertertype fluorescent lights. Keep this in mind when installing.

Inserting the batteries

1. Remove the rear lid.
2. Insert two batteries correctly into the battery compartment as indicated.
3. Put the rear lid back on.

CONNECTION

NOTE

1. Please power off all device, when connecting.
2. When connect the analog audio, Please right connect the left and right channel.
3. Connect the speaker, Please reference to Amplifier manual.
4. Please keep the Radio ANT out off the TV, WIFI, or other RF device.

POWER

For safety, Please power on or power off the device in a safe sequence, If not used for a long time, Please unplug the power cord, and do not leave the device on standby for a long time.

1. Power on device

After completeing the connection, Press the **switch** on front panel to ON, The device will start. And enter the welcome UI (The UI will vary depend on the model).

2. Power off device

When the device on working, Press the **switch** on front panel to OFF, The device will power off. When the device on working, Press the **POWER** key on remote, The device will enter standby.

Press the **POWER** key on remote, The device will exit standby and power on again.

BAND

The device have FM/DAB dual band, You can change the band to receive different programe.

Operation

Press the **BAND** key on front panel or remote, and select the FM or DAB band.

MENU

On menu, Press the **MENU** key to change the different item. And user can adjust the parameter by **LEFT/RIGHT/UP/DOWN** or **OK** key.

Stereo Mode:
 On current menu, Press **OK** to select the FM Stereo mode.

FM Stereo Gate:
 On current menu, Press **UP/DOWN** to change the gate of FM stereo. When the gate is low, It will work in stereo mode easy.

Operation

Output Level
 On current menu, Press **UP/DOWN** key to adjust the level of analog output.

Dim:
 On current menu, Press **UP/DOWN** key to adjust the display brightness.

Keyboard Lock:
 On current menu, Press **OK** to select lock keyboard function. This function will auto cancel after device reboot.

About Me:
 On current menu, Press **OK** for browse the information of the device.

System Reset:
 On current menu, Press **OK** to implement reset function. The device will reset all parameter to factory default. And then reboot.

Scanning FM

FM support scan once or auto scan function, And auto scan function support auto save the frequency to the preset memory, When it is a valid radio.

FM Scan once

Long press **UP/DOWN** key on the panel or on the remote to scanning once.

FM: 98.00MHz
Auto Stereo

⇒ FM: 98.50MHz
Auto Stereo

For save the current new frequency, Please reference to MEMORY saving.

FM Auto scan

Long press **SCAN** key on the panel or remote, The device will enter scanning state, Hold the key continue will start auto scanning.

FM: 98.00MHz
Auto tuning

In scanning state, The device will start at lowest frequency, When scan a valid radio, Device will play the sound about 2S, And save from memory preset 1.

FM: 87.50MHz
Auto Stereo

⇒ FM: 88.00MHz
Auto Stereo

⇒ FM: 88.00MHz
Save 01

When reach to the max frequency or memory is full, The scanning will exit.

Scanning DAB

In DAB, Support LOCAL/FULL scan function, After finish DAB Scanning, Device will creat a list, And allocated an index for every radio, All the DAB function is basic on this list.

⚠ **First use, must be run LOCAL/FULL scan and creat the list.**

DAB Local scan

Press the **UP/DOWN** key on the remote to change the frequency (Appendix table "DAB Freq").

Select Freq
5A 174.928MHz

After select the frequency, Press the **SCAN** key will enter scanning state, Hold the key continue will clear the old data and start auto scanning.

Local Scan
Clear Data

Local Scan
5A

When scanning complete, Device will creat a radio list, And display the total service num on screen.

Scan Found
Total Service:20

DAB Full scan

Long press the **SCAN** key on the panel or remote, The device will enter scanning state, Hold the key continue will clear the old data and start auto scanning.

Full Scan
5A-->13F

⇒ Full Scan
Clear Data

In scanning state, The device will auto scan from 5A to 13F, And save form memory preset 1.

Full Scan
5A 174.928MHz

⇒ Full Scan
13F 239.200MHz

When scanning complete, Device will creat a radio list, And display the total service num on screen.

Scan Found
Total Service:20

DIRECT INPUT

Use Direct input frequency function, We can change the radio frequency quickly.

FM

Presss **DIRECT** key on remote enter direct input frequency state.

FM Frequency
---.---MHz

Using NUM key (**1-0/10**) to input the radio frequency.

FM Frequency
8--.---MHz

If the input number is out of range, Device will ignore current input, and wait for next.

For example: When user input **8-8-0/10-0/10**, device wil display:

FM Frequency
88.00MHz

After complete input, Device will jump to the input frequency, And return to play mode.

DAB

We konw, After local/full scanning complete, Device will creat a radio list, Accord to list's index, User can change the radio station by direct. Presss **DIRECT** key enter direct input state.

DAB Index

Using NUM key (**1-0/10**) to input the radio index. If the input is out of max range, Device will auto set to the max index.

For example: When user input **0/10-0/10-8**, device wil display:

DAB Index
008

After complete input, Device will jump to the input index, And return to play mode.

MEMORY

User can save the favorite radio to memory. So that you can tune them in easily.

SAVE

Long press the **OK** key on panel or remote, Device enter save preset mode.

FM: 98.00MHz
Save --

On save mode, Press the **LEFT/RIGHT** key on panel to change the preset position.

Or press the NUM key (**1-0/10**) on remote to input the preset position.

For example: When user input **0/10-0/10-8**, Device wil display:

FM: 98.00MHz
Save 28

After complete input, Device will wait 2S, and save the frequency to the input preset, And then return to play mode.

CALL

Press the **LEFT/RIGHT** key on panel or remote to change the preset position.

Or presss **PRESET** key on remote enter call preset mode. and then press the NUM key (**1-0/10**) on remote to input the preset position. For example: When User input **0/10-0/10-8**, device wil display:

FM: 98.00MHz
Call 28

After complete input, Device will wait 2S, And call the preset frequency to the current frequency, And then return to play mode.

CHANGE RADIO

Change the FM frequency or the DAB index by manual.

FM

Press the **UP/DOWN** key on panel or remote to change the current frequency.

FM: 98.00MHz
Auto Stereo

→ FM: 98.05MHz
Auto Stereo

DAB

Accord the DAB list, Press the **UP/DOWN** key on panel or long press the **UP/DOWN** key on remote to change the preset position.

Tuning ...
Index 2

→ Prog 8
Index: 002/020

STEREO

In FM, Use this function can set the device work in auto stereo or mono.

Operation

Press the **STEREO** key on remote to change the stereo mode (or change by **MENU**).

Stereo Mode Mono → Stereo Mode Auto Stereo

MUTE

Turning off the sound temporarily.

Operation

Press the **MUTE** key on remote, To disable the sound output, Press this key again, Will exit mute state.

FM: 98.00MHz Auto Stereo → FM: 98.00MHz Mute

INFORMATION

In FM mode, If you listen a RDS radio broadcast, The device can receive the RDS information and display on screen.

In DAB mode, The device can display Ensemble/Programme/... on screen.

FM RDS

Press the **OK** key on panel or **INFO** key on remote to change the RDS type (RDS PTY→RDS PS→RDS Text→Exit).

PTY FM: 89.30MHz
PTY [Info]

PS FM: 89.30MHz
PS [89.3]

TEXT FM: 89.30MHz
Welcome To Use C

After finish select, Device will auto receive the information on the boardcase, And it will auto update on the screen.

DAB Info

Press the **OK** key on panel or **INFO** key on remote to change the information type (Total Service→Frequency→Ensemble→Programme→Data Rate→Exit).
